

MUHAMMED FARHAN A P

Full Stack Developer (MERN) | JavaScript Developer | Web Developer

+91 98475 27321 | farhanfaru6458@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer and MERN Stack Developer with hands-on experience building production-grade web applications using React.js, Node.js, Express.js, MongoDB, and PostgreSQL. Proficient in REST API development, JWT authentication, RBAC, Socket.io, real-time systems, and Agile workflows. Delivered scalable SaaS and e-commerce platforms with multi-tenancy, real-time features, and CI/CD deployment. Eager to contribute clean, maintainable JavaScript code as a junior full-stack or web developer.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Development, Socket.io, MVC Architecture

Authentication & Security: JWT Authentication, RBAC, OTP Verification, API integration, Session Management

Databases: MongoDB, PostgreSQL, Schema Design, Query Optimization

Tools & Practices: Git, GitHub, Postman, Vercel, Render, CI/CD, Agile Methodology, Nodemailer, Twilio

EXPERIENCE

Upcode Software Labs

Kannur, Kerala, India

Full Stack Developer Intern – MERN Stack

Jul. 2025 – Dec. 2025

- Built reusable React.js components and scalable Node.js/Express.js REST APIs, reducing feature delivery time and improving long-term code maintainability across the codebase.
- Designed RESTful APIs with structured error handling, input validation, and MVC architecture using Express.js, improving system reliability across client-server interactions.
- Collaborated in an Agile team using Git branching strategies, pull requests, and code reviews; identified and resolved performance bottlenecks to improve application response times.

PROJECTS

MenuOS | React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Twilio | [Live Demo](#)

Mar. 2026 – May 2026

- Architected a multi-tenant SaaS platform using Node.js and MongoDB enabling restaurant owners to onboard, configure, and publish a branded digital menu and reservation portal with a unique public URL.
- Built 10+ RESTful API modules (auth, menus, items, orders, reservations, tables, notifications) with JWT authentication, RBAC, and global error handling across 7 MongoDB collections.
- Implemented visual floor-plan table manager and real-time order lifecycle (pending → confirmed → preparing → completed) using Socket.io; OTP-based email verification via Nodemailer and SMS alerts via Twilio.

CRM System | React.js, Node.js, Express.js, MongoDB, JWT, RBAC | [Live Demo](#)

Feb. 2026 – Mar. 2026

- Architected a full-stack CRM web application with JWT authentication and Role-Based Access Control (RBAC) using Node.js and Express.js, enabling secure differentiated access for admin and sales roles.
- Built modular REST APIs for lead and contact management; optimized MongoDB schemas and queries to improve data retrieval performance.
- Developed a component-driven React.js frontend with clean state management, improving UI consistency and reducing component coupling across the application.

Shop.co | React.js, Node.js, Express.js, PostgreSQL, JWT | [Live Demo](#)

Nov. 2025 – Dec. 2025

- Built a full-stack e-commerce web application with Node.js/Express.js backend and responsive React.js frontend, supporting product browsing, cart management, and checkout flows.
- Designed normalized PostgreSQL relational schemas for users, products, and orders; implemented JWT and session-based authentication to protect user accounts and transactions.
- Delivered scalable RESTful API endpoints with comprehensive input validation and error handling, ensuring consistent and reliable data exchange between client and server.

Zaylo | Next.js, React.js, JavaScript, Tailwind CSS | [Live Demo](#)

Oct. 2025 – Nov. 2025

- Built a high-performance fashion storefront using Next.js with Server-Side Rendering (SSR), improving initial page load speed and search engine visibility (SEO).
- Implemented dynamic routing and reusable React.js UI components for seamless navigation across nested product categories.
- Improved Core Web Vitals scores through systematic image optimization, component lazy-loading, and responsive Tailwind CSS layout design.

EDUCATION

Sir Syed Institute For Technical Studies

Bachelor of Science in Computer Science

Kannur, Kerala, India

Aug. 2022 – May 2025

CERTIFICATIONS & ACHIEVEMENTS

- Completed a structured MERN Stack Development training program covering full-stack application architecture, REST API design, and database management.
- Participated in a hackathon as project lead – designed and delivered a working full-stack web application prototype under time constraints.
- Independently built and deployed multiple full-stack JavaScript applications to production using Vercel and Git-based CI/CD workflows.
